A new model for assurance

'We have set ourselves two very challenging aims - to stage not only the greatest Games ever but, as importantly, those Games in 2012 must be the most sustainable in the history of the modern Olympics. This overriding principle has been built into our plans from the word go and I am confident that with Shaun McCarthy’s expert leadership and this team he has recruited we will set the sustainability standards that will become the benchmark for the hosting of all future Olympic and Paralympic Games.'

Former Mayor Ken Livingstone
15 May 2007
BORIS JOHNSON, THE MAYOR OF LONDON
CSL’s Purpose…

To provide independent assurance and commentary in order to enable the sustainability objectives of the London 2012 programme to be achieved and to support a sustainable legacy.

Critical success factors
Ground rules
Accountability
Can procurement help?

“One of the most effective ways we found to deliver a sustainable Games is to embed sustainability upfront in the procurement process. Our Sustainable Sourcing Code is inspiring change amongst our suppliers, sponsors and licensees, who see the business advantages of sourcing sustainably”

Paul Deighton – CEO London Organising Committee of the Olympic Games – April 2011
Can it be good for your career…?

Oh yes...!
Measure

400,000 tonnes of carbon dioxide equivalent saved (against reference footprint)

62% per cent out of a total of 10,173 tonnes of Games operational waste actually reused, recycled or composted

99% per cent out of a total of 61,000 tonnes of waste from installing and decommissioning Games venues reused or recycled

75 number of event related papers published on Learning Legacy website

100% per cent Games operations waste diverted from landfill

86% per cent of Olympic Park visitors travelled by rail

70% per cent of LOCOG suppliers were SME’s contributing 26% per cent by value of our programme

39% per cent of staff directly employed by LOCOG at the peak of the Games had been unemployed prior to their recruitment

15.5 million sustainably sourced meals
Measures are not just numeric
Energy

Monitor the Olympics’ energy consumption in real time

Which uses more electricity, Tower Bridge or the Olympic Stadium? How do the capsules on the EDF Energy London Eye stay cool in summer and warm in winter? How much energy does the Aquatics Centre or Velodrome use on any given day?

Our intelligent data display brings you a unique control panel for monitoring the key sites of London 2012 in real time.

Sustainable?

www.supplychainschool.co.uk
“We want our One Planet Olympics to be the most complete and sophisticated expression of sustainable development ever delivered on a city-wide scale. We want it to benefit not just London and the UK, but to be a credit to the Olympic Movement as a whole.”

Lord Coe, Environment Forum, 7 March 2005
“We have always maintained that, taken in isolation, delivering and Olympic and Paralympic Games is an inherently unsustainable thing to do. We therefore cannot call the programme truly sustainable unless the inspirational power of the Games can be used to make a tangible, far reaching difference”
