Source: Based on International Energy Agency, <u>Monthly Electricity Statistics – Data up to December 2021 (March 2022)</u> (downloaded 16 March 2021). Modified by Renewable Energy Institute.

Notes:

- Net electricity generation.
- "Fossils" includes coal, oil and gas.
- "RE" (renewable energy) includes hydro, bioenergy & (renewable) waste, geothermal, wind, solar and other renewables (e.g. tide, wave, ocean… which are negligible and included in hydro).
- "Other" includes non-renewable waste and non-specified sources.
