Source: Based on International Energy Agency, Monthly Electricity Statistics - Data up to June 2022 (September 2022) [downloaded 16 September 2022]. Modified by Renewable Energy Institute.

- Notes:
- Net electricity generation.
  - "Fossils" includes coal, oil and gas.
  - "RE" (renewable energy) includes hydro, bioenergy & (renewable) waste, geothermal, wind, solar and other renewables (e.g. tide, wave, ocean... which are negligible and included in hydro).
  - "Other" includes non-renewable waste and non-specified sources.
