

Session 1B: Finance

1. Investment is steadily rising into renewable energy sector, e.g. wind. However, there remains significant variation where money is going – big or small players.
2. Public finance assists in creating conditions that attract private capital.
3. Challenge is not a shortage of capital (though recession is a concern) but a need for conditions that can facilitate the deals especially at small investment levels.
4. Perception on risks and returns varies. Inadequate communication or inexperience may lead to heightened risk aversion. Risk mitigation tool might be sought.
