

# Regulatory Framework and Issues for Offshore Wind

## <Uniform Rules for Occupation and Coordination with Stakeholders>

- ◆ General Water: Up to 30 years. Coordination committee including fishermen.  
New bill for promoting offshore wind was passed into law at the Diet at the end of 2018.
- ◆ Port Areas: Up to 20 years (Port & Harbor Act). Coordination with stakeholders to be conducted by individual developers.

## <FIT Price>

- ◆ JPY36/kWh for 20 years (Until FY2019 for bottom-mounted and FY2020 for floating)
- ◆ Auction price for general water projects in case the new bill is applied.

## <Grid Connection>

- ◆ To be secured by developers. Under the new bill, grid connection rights will be transferred to the preferred bidder eventually. ➔ Currently, a new framework being discussed.

## <Base Port/Harbors (for general water)>

- ◆ To be developed in the near future.

## <Other Issues>

- ◆ “Cabotage” regulations, Rules for decommissioning, Expediting Environmental Impact Assessment.
