

SNAPSHOT OF V20 PRIORITIES

I. Enabling Investment in Resilience and Energy Transition

- a) Address high costs of capital and mismatch of loan maturities to enable more private & public climate investments
- b) Engage with G20 on financing resilient and green infrastructure including developing a broad menu of instruments
- c) Drive investment to reduce losses from transition risks (including stranded asset risk)
- d) Enable resilient debt management

II. Integrated Climate and Disaster Risk Management and Finance

- a) Strengthen engagement with the G20-V20 InsuResilience Global Partnership and partners with related initiatives
- b) Promote integrated risk management and financing, including through the Sustainable Insurance Facility (SIF)
- c) Address development and macroeconomic stability implications of climate change risks with respect to the cost of capital for vulnerable countries
